

Toyota Forklift Part

Toyota Forklift Part - Ever since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, has been the best selling lift truck dealer in the United States. This business has been headquartered out of Irvine, California for well over 40 years, offering a wide-ranging line of quality lift trucks. With an impressive reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota's manufacturing plants within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continual progress, and its environmental methods. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift trucks emit 70 percent fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A. - Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to construct high quality lift vehicles at the same time as providing first-rate client assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also known as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is amongst the magazines prestigious World's Most Admired Companies.

Redefining Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company values towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other corporations and certainly no other materials handling producer can yet rival Toyota. Environmental responsibility is an important aspect of corporate decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more involved 2010 emission standards. The end creation is a lift vehicle that creates 70% less smog forming emissions than the present Federal standards tolerate.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of dealers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift trucks offer better strength, visibility, productivity, ergonomics, and all the leading safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps reduce the possibility of mishaps and injuries, and increasing productivity levels while minimizing the potential for merchandise and equipment breakage.

System Active Stability can sense conditions that may lead to lateral instability and potential lateral overturn. When one of these factors have been sensed, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding durability.

SAS was first launched to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS has been built-in to nearly all of Toyota's internal combustion machines. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with obligatory worker instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% reduction in industry wide collisions, loss of control, falls and tip overs from a lift truck for the same period.

Toyota's pattern of excellence reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training curriculum to help customers meet OSHA standard 1910.178. Instruction programs, video tutorials and various materials, covering a wide scope of matters-from personal safety, to OSHA regulations, to surface and load conditions, are available through the vendor network.

Since the transaction of its first lift truck in the U.S. to the fabrication of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has maintained a solid presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America today are manufactured in the United States.

TMHU is based in Columbus Indiana and houses nearly 1 million square feet of production facilities over 126 acres of property. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service parts, with the whole commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and buyers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and lastly a education center.

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure total customer satisfaction.
